

Vaccination Programme

All our hens are undergo a full vaccination programme for the most commonly occurring conditions.

| Age in days | Vaccination against |
|-------------|--|
| 1 day | Mareks Disease |
| 7 days | Salmonella |
| 21 days | Newcastles Disease |
| 24 days | Gumboro (Infectious Bursal Disease) |
| 35 days | Gumboro (Infectious Bursal Disease) |
| 42 days | Infectious Bronchitis |
| 45 days | Salmonella |
| 49 days | Mycoplasma |
| 56 days | Infectious Bronchitis Variants |
| 77 days | Avian Encephalomyelitis |
| 80 days | Infectious Bronchitis Variants |
| 105 days | Mycoplasma |
| 112 days | Infectious Bronchitis, Newcastles Disease, Avian Rhinotracheitis & Egg drop syndrome |

Both our hybrids *and* pure breeds are vaccinated under this programme to ensure the health and welfare of our birds is not compromised.

This programme ensures that the birds we sell are of the best possible quality possible, saving you the potential risk and upset that a serious disease amongst your chickens could cause.

Our birds are also wormed quarterly with veterinary approved and medicated wormer – Flubenvet.
